

BEAUTIFUL TOURER

The Vita is one of Nova Caravans top luxury vans, with an exquisitely designed and thoughtfully laid-out interior to suit anyone

Operating for over 10 years, Nova Caravans is led by a managing director with over 30 years in the caravan industry and their devotion to creating quality, luxury caravans that are built to withstand the harsh Australian conditions has seen them emerge as a market leader in style and innovation. This devotion to supplying their customer's with the very best has led

to the birth of the Nova Vita.

A luxurious caravan with such fantastic standard inclusions as a Preston perforated chassis, Nova's own DC Battery Management System, an East/West facing bed and an ASA moulded front, the Nova Vita is suitable for almost anyone, from RVers seeking a free camping van or long-term tourer, to first-time buyer's looking for a well-priced RV with all the luxuries of home.

UNIQUE FEATURES

- EAST/WEST QUEEN BED
- RV WIFI AS STANDARD INCLUSION
- PRESTON CHASSIS 21'6" – PERFORATED WITH 50MM CHASSIS RAISER
- DRIFTER WATER AND BATTERY MANAGEMENT SYSTEM
- ASA MOULDED FRONT

The front compartment of the Vita is constructed using high quality ASA plastic, a material that has great toughness and rigidity, good chemical resistant and thermal stability, outstanding resistance to weather, aging and yellowing and maintains a high-gloss. The Vita has been designed using this plastic as it houses Nova's DC Management Board. A control system that handles both your 12V and battery management – essentially powering the entire caravan. You definitely don't want that getting ruined when on the road. Ultimately it's a strong, durable alternative to the more common fibreglass design; you can be assured it will last the test of time.

POWER IN ONE PACKAGE

The most standout feature of the Nova Vita is the inclusion as standard of their DC management board. Designed by the professionals at Nova, the DC management board incorporates all your 12V and battery management needs in one simple package. This 12V and battery management system is stowed away in the front opening boot, meaning it's easy to access, safe, and stays out of sight. Included in this package is the low-voltage cut-out, Projecta battery charger and Projecta DC to DC charger, which incorporates the solar regulator, and you'll also find the fuse board and the brake safe battery module.

SMART DESIGN

The Nova Vita is a true example of 'smart design', every element of the Vita has been heavily scrutinised for its ability to make your life on the road as easy and enjoyable as possible. This build objective is evident through the inclusion of the rarely seen east/west bed. Some may think that changing the direction of the bed is a small factor, but it's actually a pivotal aspect of the Nova Vita, allowing for a big front kitchen and larger rear ensuite. It also gives you a bigger than average wardrobe, more usable floor space and more room to get in and out of bed.

Of course, this extra living and storage space needs to be supported by the structure of the van, that's why Nova have chosen the Preston Perforated

Chassis to carry along your 'home away from home'. Preston Chassis Industries have spent 40 years designing chassis for the Australian climate and conditions and each design meets the Australian Design Rules and Australian Standards set by RVM. The benefits of a perforated chassis is that it can save you 20 to 30kg in weight, it also facilitates the running of pipes and wires through the chassis, as opposed to underneath the caravan – meaning your power and water systems are protected. The metal is machine stamped and the perforation runs along the chassis, not down, meaning you don't lose strength. Nova have also included a 50mm riser, giving you more ground clearance and allowing you to venture down the rougher roads.

INTERNAL FEATURES

FRIDGE: Thetford N3185-E 185L 3-way

- EXTERNAL LIGHTING:** LED
- REVERSE CAMERA:** Yes

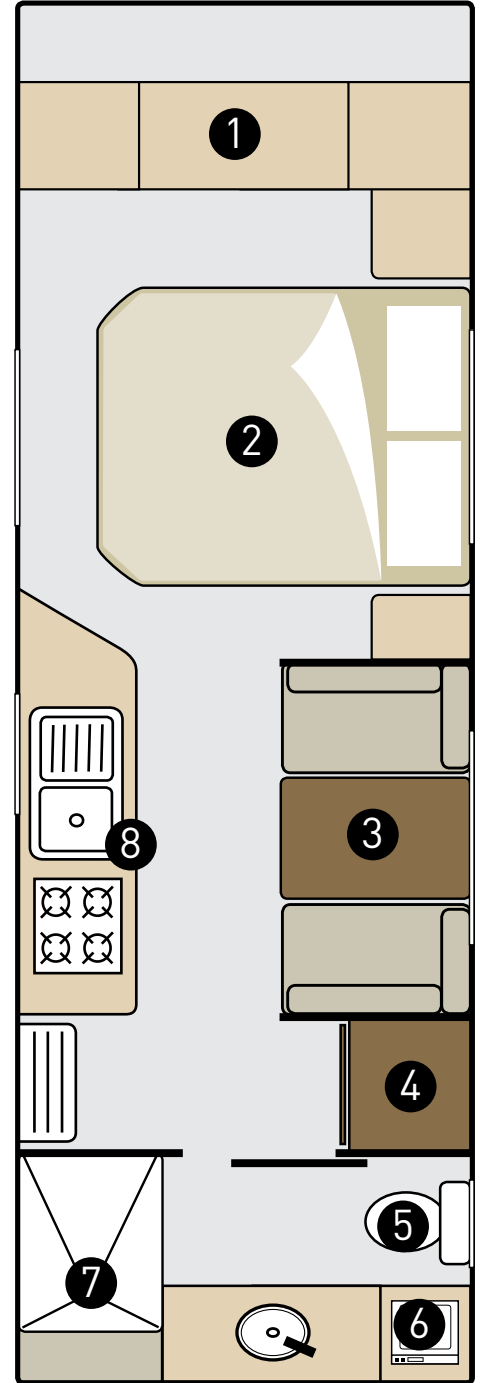

Nova have also included, as standard, an RV Wi-Fi system that uses Telstra 3G and 4G coverage. Just like your internet at home, you set and forget! That's not all, the best part is that you'll only incur costs when you're using your caravan. Stay in touch and up to date with family and friends in the Nova Vita.

Not only is it important for your caravan to have the right water and power capabilities for your vanning needs, it's also important that the inside of your RV be comfortable and well designed. That's why Nova have thoughtfully included a gorgeous marble-look feature wall in the ensuite and waterfall benchtop in the kitchen. These may seem like small features, but it's the little things that truly make you feel at home in your caravan.
